1. What is the title of your film or video production?

2. Is it an animation or video/film production?

Animation

☐

Video/film

☐

3. Which of the following categories best suits your science and agriculture production?

Ø Processing options (e.g. expanding product range, reducing imports, increasing incomes)

Ø Ensuring locally grown and processed foods are safe for consumption (e.g. good agricultural practices, judicious use of chemical inputs, meeting national and international standards)

Ø Production of nutritious foods (e.g. preserving nutritional value, reducing salt and fat)

Ø Greening the environment (e.g. renewable energy /reducing reliance on fossil fuels, climate proofing, blue economy/over fishing; preserving Caribbean ecosystem / biodiversity; Aquaculture is it an option)

Ø Consumer / market driven (understanding and responding to consumer demands e.g. convenience packaging, online marketing)

Ø Promoting the benefits of local foods ( e.g for health and wellness; why buy and eat local);

Ø Producing and using high quality planting material / improved breeds (e.g. using indigenous resources, certification)

Ø Science and technology (e.g. biotechnology, nanotechnology, biochemistry, engineering for new /improved products, processes etc);

Ø Information technology (e.g e-commerce, e-marketing, precision farming);
