

Wageningen UR Library

Ger Spikman, Hubert Krekels, Hugo Besemer, Ger Naber

Program

- Welcome and introduction:
 - Ger Spikman, Head Selection and Content Management
- Serving Knowledge Exchange
 - Hubert Krekels, Head of Documentation and Publication Services
- Wageningen UR Library and ACP Countries
 - Hugo Besemer, Information Specialist / Consultant
- ISRIC - World Soil Information Database
 - Ger Naber, Librarian / Consultant

Wageningen UR

- Wageningen UR is the umbrella organisation of
 - Wageningen University
 - DLO institutes for applied and field research
 - Van Hall Larenstein School for higher professional education
- Wageningen UR Library is responsible for all library/information services of Wageningen UR

Library Wageningen UR

- We had 40 library locations
- 2007: one Library (organisation) at 2 locations in Wageningen and some regional locations
 - Main Library in Forum building (life sciences)
 - Branch Library in Leeuwenborch building (social sciences)
- Staff 82 fte, turnover m€ 11,5

Library collection

- 600.000 monographs
- 10.000 e-journals
- > 45000 e-documents (monographs)
- Bibliographic databases with direct links to full-text

Core processes of the library

- Collection development
- Logistics
 - Acquisition (subscriptions, ordering)
 - Catalogue production
 - Interlibrary loan and lending
- Application development and management
- Documentation and Publication Services
- Library

Consequences of current development

- More distance between users and printed collections
- More dependence on digital library
- Less face-to-face personal help and contact
- Redefining the library concept
 - A place to work and study
 - A place to meet people and work together
 - More vivid, less silence
- Redefining our role in primary processes of Wageningen UR: education and research

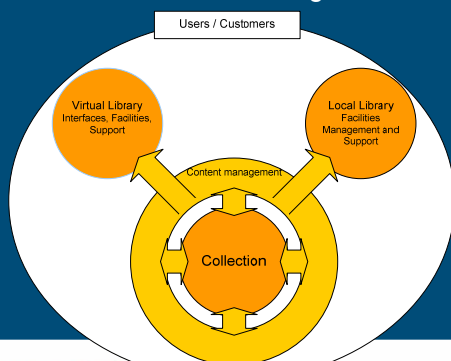

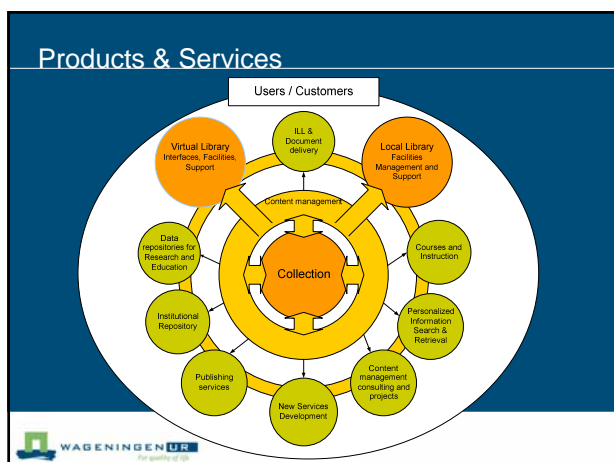

We have to offer

- High quality digital library (functionality, content)
- Intensive Information Literacy program; Distance learning, self-instruction
- Excellent study facilities (rooms, computers etc.)
- Well educated staff
- Direct support of research and education: a.o. facilitating e-publishing, repositories

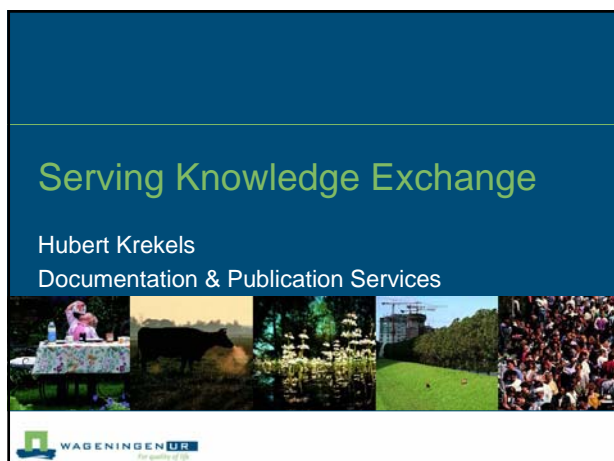

Core Process: Content Management

Library extension

- Traditional role: Serving **our** researchers and students with information.
(Outside → In)
- Additional role: serving **all** researchers, students and **public** with Wageningen UR knowledge.
(Inside → In/Out)

Research information

- Store & Register Publications
 - Wageningen Yield
 - Stimulate Open Access → Darenet
- Register Projects/Research
 - Dutch Research Database
- People profiles
 - We at Wur
- Management information and administration
 - Metis: people, projects, publications
 - Citation count and analysis

Why?

- Maximize research impact
- Stimulate knowledge exchange
- Optimize accessibility and visibility
- Develop alternative publication strategies: open access / open choice

The two open-access strategies:

Gold and Green

Open-Access Publishing (OApub) (BOAI-2)

1. Create or Convert 23,000 open-access journals (1000 exist currently)
2. Find funding support for open-access publication costs (\$500-\$1500+)
3. Persuade the authors of the annual 2,500,000 articles to publish in new open-access journals instead of the existing toll-access journals

Open-Access Self-Archiving (OAarch) (BOAI-1)

1. Persuade the authors of the annual 2,500,000 articles they publish in the existing toll-access journals to also self-archive them in their institutional open-access archives.

Even this makes some people happy.

SEP compliant table of WU publications by publication year for MOE

Programme results: outcome numbers		2005	2006
1. Academic publications	a. in refereed journals	148	138
	b. in other journals	20	21
	c. refereed book chapters	36	66
	d. non-refereed book chapters	52	40
	e. monographs	11	14
	f. edited books	13	19
	g. proceedings (full papers only)	162	131
	h. scientific reports	53	49
Total academic publications		497	507
2. PhD Theses		23	25
3. Professional publications and products (incl. IP)		135	125
4. Publications for the general public		54	34

List of WU publications by publication year for MOE

How?

- Organise the workflow
- Support researchers and staff
- Cooperate (Dare, Driver)
- Use publicly available services & tools (D-space, OJS, etc.)
- Be patient

(E) Publishing support

- Open Journal Systems
- Copyright information desk
- Digitization
- Web services
- Citation analysis

Research information developments

- Supporting E-science → collaboratories
- Exchange learning materials → learning object repositories → Lorenet
- Store and exchange datasets

Access: we can not help you but.....

- You can get access to electronic journals through several organizations:
- Agora (FAO)
- Hinari (WHO)
- OARE (UNEP)
- Peri programme (INASP)

Agora

OARE
ONLINE ACCESS TO RESEARCH IN THE ENVIRONMENT

OARE
OARE is Online Access to Research in the Environment

Eligibility
OARE Publisher Partners offer scientific literature to eligible institutions in 137 countries. Eligible institutions include all public institutions and all local non-governmental organizations. Examples include universities and colleges, professional training schools, research institutes, government agencies and other government offices, libraries, public media, and local NGOs.

COUNTRY AND INSTITUTIONAL ELIGIBILITY
The list of eligible countries below is based primarily on GNI per capita (World Bank figures, 2006). The 72 countries in Band 1 have a GNI per capita below \$1250 US. Institutions in Band 1 countries are eligible for free access to all OARE resources. The 65 countries in Band 2 have a GNI per capita between \$1250 and \$3700. Institutions in Band 2 countries are asked to pay a nominal fee of \$1000 per year per user institution. This fee, which represents less than 0.1% of the annual retail subscription value of the scientific resources in OARE, is reinvested in the partnership to support continued training and outreach activities in developing countries. Institutions in Band 2 countries receive a free four-panel enrollment of three months.

Agricultural document repositories: AGRIS

<http://www.fao.org/agris/>

The new AGRIS search application provides access to a large collection of world literature covering all aspects of agricultural science and technology, including grey literature which is not available through normal publication and distribution channels.

The AGRIS repository is continuously updated and currently contains over 2.3 million bibliographic references in the AGRIS AP TDM format from 1970 to date. This data is collected from AGRIS resource centres in over 100 countries worldwide.

This application provides a simple search tool into which a user can type a query to search the entire repository. A "Search Assistant" allows for more sophisticated searches. The search results provide metadata (DOI, author, abstract, publisher, etc.) of bibliographic references and where available, a link to the full-text document. A Google search for the full-text document of a bibliographic record can be initiated.

Please send to FAO-Agris-Carlis@fao.org your comments and feedback regarding the functionality of this new interface and created reports so that we can help us to improve the application.

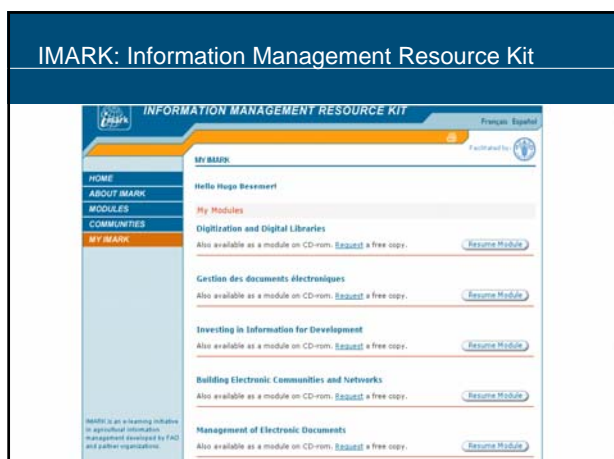

Agricultural document repositories: Agnic

This module "harvests" metadata from full-text, open repositories. These repositories are all registered as "Registered Data Providers" with the Open Archives Initiative.

Capacity building

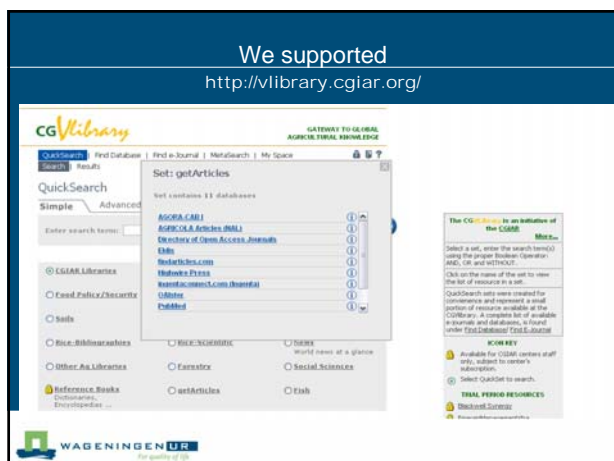

- New ways of working with information
- New ways of publishing information
- Managing the new ways of working

IMARK: Information Management Resource Kit
